With each CID operating in a special rating area (SRA), CIDs are able to offer complementary services to those of the City. With the number of CIDs climbing year-to-year as ratepayers vote them into operation, how have these contributed to investor confidence? The past year has seen intensified discussions and debate between local government and residents, and between the public and private sector, centred around the concepts of densification, infrastructure and how to secure finance. How integrated with demand realities is the City's planning around Municipal Planning Bylaws and Local Spatial Development Plans plus the associated infrastructure strategies? Where are we on the Budget? Is the GNU working for the City and for private sector investment? With the lessons from this conference, we ask: "Where to from here?" for the property development and construction industry in Cape Town and the Western Cape.
