Enter the Age of

AI Scanning Tools + Drag & Drop Technology

Phase 1:

Vision Mapping & Interactive 3D Blueprint

Rapid Prototype: 3 Days

Sun Mapped to Exact Location

Real Views from Every Window

Explore your Building & Surrounding Area Contextualized to its Environment

Phase 2:

Stakeholder Alignment & Real-Time Cost Planning

Imagine planning sessions where every stakeholder — from developer to engineer — is looking at the same evolving model & has the ability to make adjustments in realtime

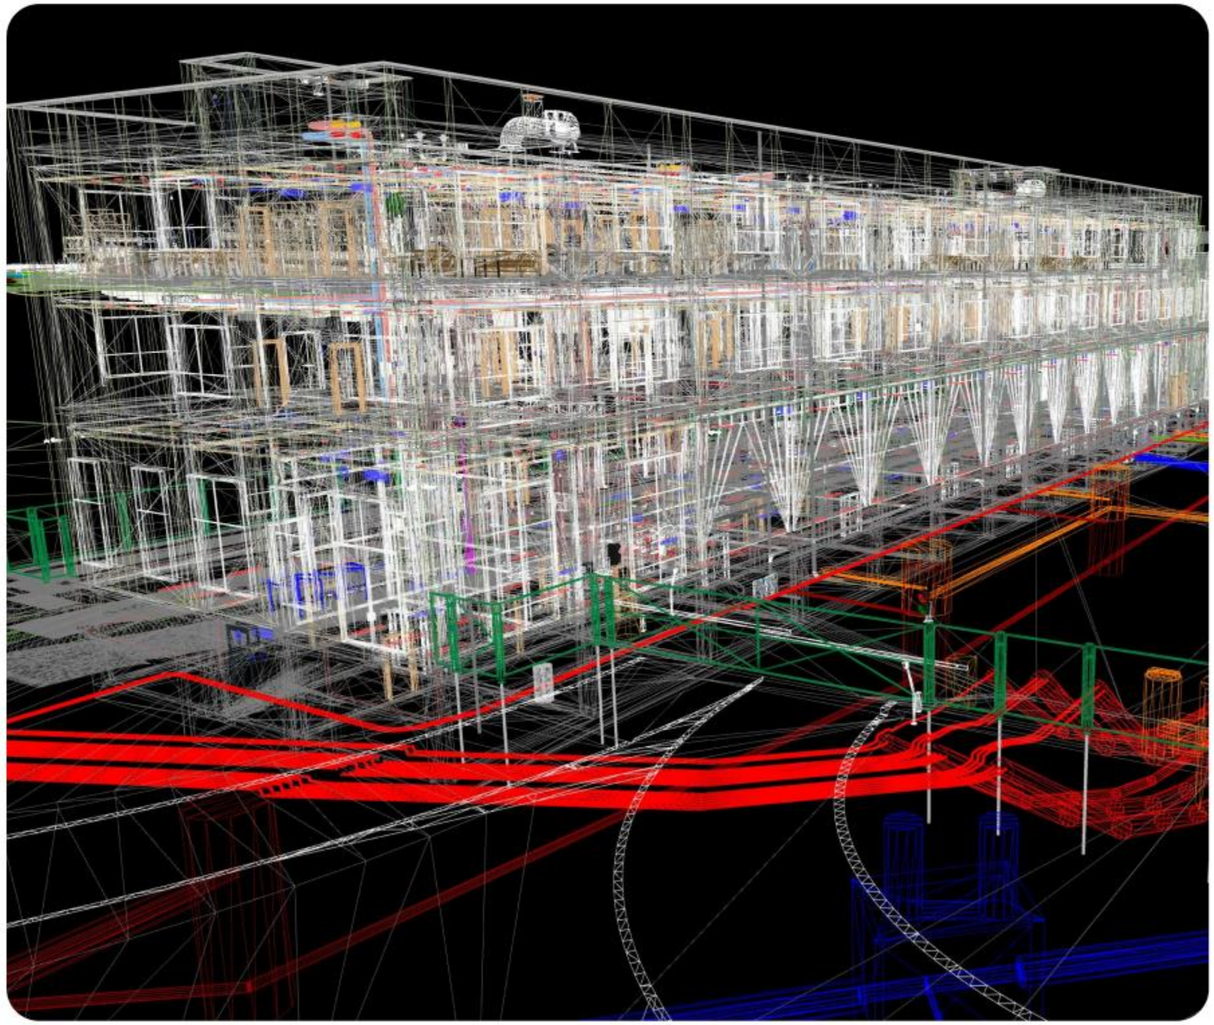
Phase 3:

Clarity for Construction

Peel away layers:
Electrical conduit, water pipes, air vents

Overlay GIS data, Utility Grids,
Demographic Data, Weather Simulations,
Municipal Grids

Design oversights are caught before they cost you. Budgets Become Accurate



Phase 3:

Clarity for Construction

Phase 4:

PHASE 4

Go-to-Market Efficiency

Once a project is approved, Meta-dology seamlessly transitions from planning tool to activation platform—serving every stakeholder in the value chain.

For architects,

it becomes a presentation-ready model to articulate design intent with precision.

For construction professionals,

it provides a continuously updated visual reference—reducing on-site confusion and aligning subcontractors.

For retail and commercial developers,

it creates immersive pre-leasing tools to engage investors and tenants early

For residential teams

it empowers buyers to explore and personalize their future homes with confidence
